LOAD TRANSFORMED DATA IN POWER BI DESKTOP

VEZINDUNA MBEKEZELI NDLOVU

21 AUG. 26

Project Summary

Data cleansing and transformation techniques to start your data model, then applied the queries to load each as a table to the data model. With an outcome on the canvas in Power BI Desktop, with the 7 tables loaded to the data model. This was an excellent exercise on applications of various transformations and loading queries to the data model.

APPLY VARIOUS TRANSFORMATIONS	LOAD QUERIES TO THE DATA MODEL
1 SQL Server database (6 tables) + 2 online files	Total of 7 tables

Notes:

- Had to change the parameters from **localhost** to **Vezinduna\SQLExpress** since localhost was not working and set a **Credentials** (username and password)

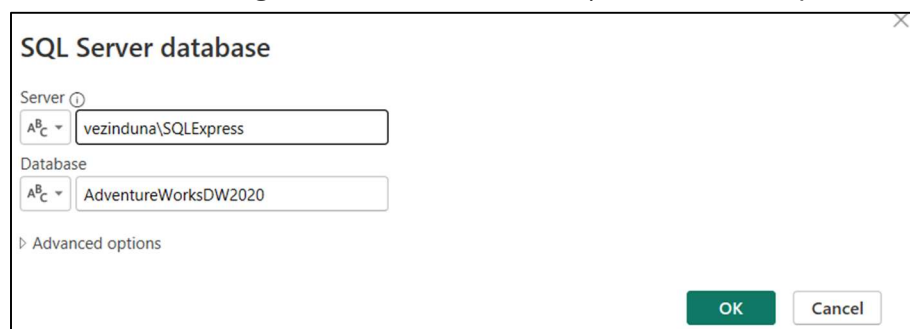

Figure 1: SQL Sever Database setting up

- On the Sales query, I have to rename **StandardCost** due to the calculation using it **StandardCost** renamed

$$\text{if } [TotalProductCost]$$

$$= \text{null then } [OrderQuantity]$$

$$* [StandardCost] \text{ else } [TotalProductCost]$$

- On Targets query, region for the PC is set to **South Africa** and not **United States**

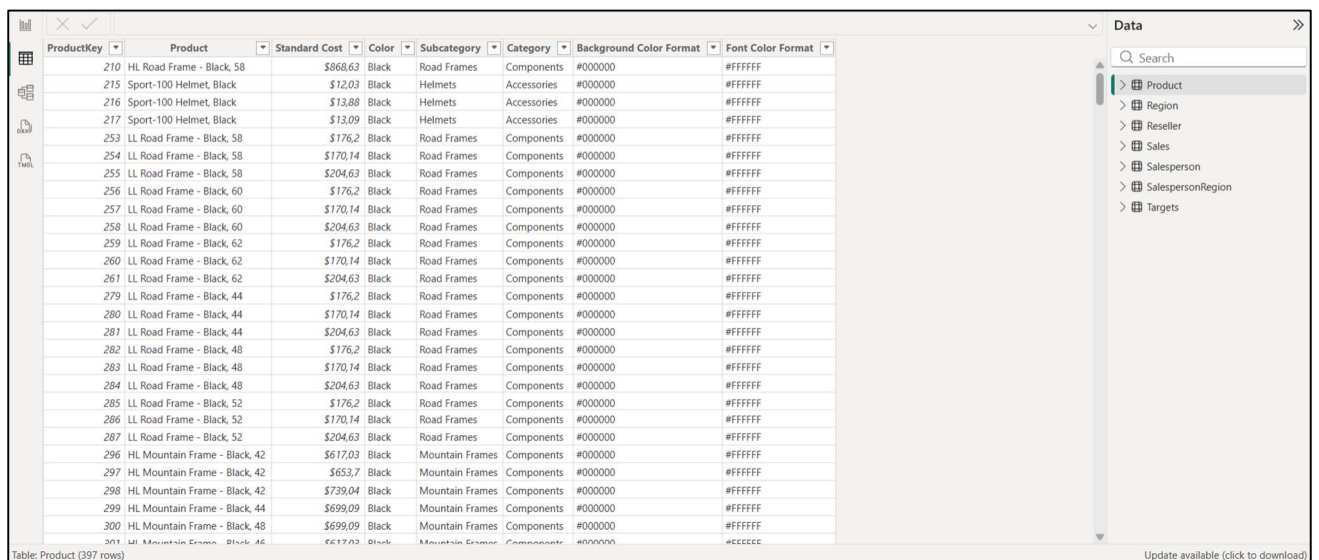

A dialog box titled "Change Type with Locale". It contains the instruction "Change the data type and select the locale of origin." Below this, there are two dropdown menus. The first is labeled "Data Type" and has "Text" selected. The second is labeled "Locale" and has "English (South Africa)" selected. At the bottom right, there are two buttons: "OK" (in a green box) and "Cancel" (in a white box with a grey border).

Figure 2: Default locale set to en-South Africa

- On the instructions, 3 columns and **809 rows** were expected but 3 columns and **972 rows** was what I got. This will be worth looking into.

The image shows a screenshot of a data model interface. On the left, there's a sidebar with icons for different views. The main area displays a table with columns: ProductKey, Product, Standard Cost, Color, Subcategory, Category, Background Color Format, and Font Color Format. The table contains 397 rows of data. On the right, there's a "Data" pane with a search bar and a list of tables: Product, Region, Reseller, Sales, Salesperson, SalespersonRegion, and Targets. The "Product" table is currently selected.
